SEIZED DRUG SECTION FACT SHEET

Location(s): Forensic Investigation Center, Mid-Hudson Satellite Crime Laboratory, Southern-Tier Satellite Crime Laboratory, Western Satellite Crime Laboratory

The Seized Drug Section of the NYSP Crime laboratory provides drug analysis on submissions from state and local law enforcement agencies.

Seized Drug Section Technical Contacts

NYSP Laboratory System

Margaret LaFond, Associate Director – (518) 457-7010

Forensic Investigation Center

Christopher McDonough, Supervisor of Forensic Services – (518) 485-2710

Mid-Hudson Satellite Crime Laboratory

Joelyn Cornwell, Supervisor of Forensic Services – (845) 762-5171

Southern-Tier Satellite Crime Laboratory

Abigail Roberts, Supervisor of Forensic Services – (607) 648-7868 ext. 301

Western Satellite Crime Laboratory

Jeffrey Marciano, Supervisor of Forensic Services – (716) 373-3668 ext. 275

NYSP Seized Drug Section Current Services

- Analysis and reporting of most Controlled substances listed in NYS Article 3306 of the Public Health Law.
- Quantitative Analysis and reporting of Cocaine, Ketamine, MDMA, PCP and Psilocybin
- Clandestine Laboratory Analysis of Methamphetamine, Precursors (Pseudoephedrine, Ephedrine) and Reagents (Iodine only).

NOTE: An appropriate analytical method will be utilized in analyzing evidence according to laboratory guidelines in accordance with ISO/IEC 17025 or ANAB accreditation.

The Forensic Scientist will routinely test enough samples necessary to determine the highest degree of crime according to Article 220 and 221 of the Penal Law. It is policy that laboratory personnel will select the item or items most appropriate for analysis and will determine the scope of analysis as well as the analysis to be performed. The Seized Drug section of the NYSP Crime laboratory does not consider this a change to the contract and is not required to make notification to the customer.

Evidence submitted for controlled substance analysis is prioritized and assigned based upon statutory offense level, court requests and/or investigatory purposes by the Section Supervisor at each laboratory. Higher offense level submissions needed for trial will supersede all other requests. Lower offense level submissions will not routinely be prioritized unless a trial date has been established and verified by the County Prosecutor. A Supervisor of Forensic

Services or Associate Director may assign these cases discretionarily, based on an individual request and laboratory resources.

Miscellaneous Information

- Federal drug submissions will be assigned only when a specific request has been made by the prosecuting attorney and communicated to the Supervisor of Forensic Services or Associate Director.
- Analysis will not be performed on submissions previously analyzed by another accredited laboratory. An exception to this policy would be when an additional service is requested and is not offered by that laboratory (i.e. psilocybin quantitation). Those requests would be granted at the discretion of the Associate Director – Seized Drug Section.
- Quantitations will be performed only when a specific request has been made by the prosecuting attorney and communicated to the Supervisor of Forensic Services or Associate Director.
- Residues will not be analyzed unless they are the only items in a case.
- Contents of hypodermic instruments submitted with needles will not be analyzed.
- Submissions of Unlawful Possession of Marihuana (under 2 ounces) will not be analyzed without a request from the prosecuting attorney.
- NYSP Laboratory does not test for or report concentrated cannabis.
- Moldy marihuana cases submitted to the laboratory will not be analyzed.
- Analysis on more than one marked pharmaceutical will not be routinely performed when a physical appearance identification is made on multiple similar sub-items.
- Non-controlled pharmaceuticals (i.e. tablets, capsules) from commercial manufacturers will not be routinely analyzed.
- Representative sampling and extrapolation of weight may be utilized as appropriate on submissions with over 30 sub-items.
- Subcontracting may be utilized at the discretion of the Associate Director – Seized Drug Section.
- The laboratory may not record the aggregate weights of all submissions (based upon the review of information provided on the submission forms - offense type, gross weights, description of events, item types, etc.). However, when meaningful to the charge, the aggregate weight of the items will be captured and reported.

Seized Drug Section Returned Without Analysis Program (RWOA)

- To manage the current drug case backlog, all drug evidence that has remained at the laboratory over six (6) months will be returned to the submitting agency without analysis. Prior to returning unanalyzed drug cases, notification to the District Attorney's offices will be made. At any time if the evidence is needed for prosecution, it may be resubmitted to the laboratory for analysis.
