---

### **Looking Beyond the Passenger Vehicle**

George Donahue, Sergeant, New York State Police, Division Traffic Services  
Commercial Vehicle Enforcement Unit  
George.Donahue@troopers.ny.gov

How, why, and when to stop a commercial vehicle.

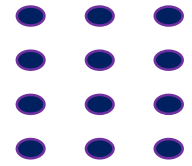

### **Introduction to Connected and Automated Vehicle Technology for LE**

Paul Steier, Director, Vehicle Programs, AAMVA  
PSteier@aamva.org

Kipp Loving, Law Enforcement Liaison, Reviver  
Kipp.Loving@reviver.com

Vehicles on the roadway are equipped with a significant amount of technology intended to keep roadways safer and provide convenient features for vehicle occupants. This technology and the data it contains also provides opportunity and challenges for law enforcement that they need to be prepared to interact with. During this session, attendees will be introduced to connected and automated vehicle technology, learn what data this technology contains, and gain an understanding of how this technology can assist when conducting crime and crash investigations.

## **The Synergistic Reaction of T-T-T-P to Enhance Enforcement Effectiveness**

Robert Duckworth, SoToxa Program Manager, Intoximeters  
RDuckworth@intox.com

Good, Better, Best. Bridging the gap between better and best. While Standardizing Field Sobriety Tests remain validated for alcohol, at roadside, officers rely on all tools necessary to identify impairment and the causes of impairment. This requires T-T-T-P, it's a chemical formula to enhanced enforcement effectiveness of impaired driving offenses. Synergistically, Training, Tools, Testing, and Partnerships work together to Enhance Enforcement Effectiveness.

## **County Crash Dashboard Demonstration**

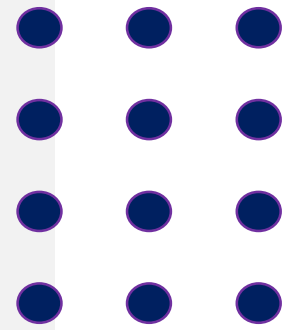

Benjamin Engwer, Crash Analyst Liaison, New York State Sheriffs  
Association/Governor's Traffic Safety Committee  
Ben.Engwer@dmv.ny.gov

The county crash dashboard is a user-friendly, comprehensive platform that allows agencies to interact with their local crash data. Learn how to use the dashboard to analyze crashes and determine prevalent locations, day of week, time of day, and contributing factors to efficiently and easily create a data-driven roadmap to crash reduction, provide targeted educational outreach, and improve deployment of resources to address local traffic safety issues.

## **Temp Tags and Ghost Cars – Trends and Enforcement in New York State**

Charles Cahill, Investigator, New York State Department of Motor Vehicles  
Division of Field Investigation  
Charles.Cahill@dmv.ny.gov

Temporary Tags and Ghost Cars. Trends and enforcement in New York State.

---

## **The Job Isn't Dead**

Ryan Hutton, Trooper, Missouri State Police, Owner, Extract-ED  
training@extract-ed.com

Employee morale seems to be at an all-time low in law enforcement. What's causing this and what actions can we take to fix it? As employee turnover continues trending upwards, all while recruiting and applications fall, employers find themselves in an anomalous situation. The first step in solving the manpower crisis is to identify the top issues law enforcement is facing. Addressing these issues help increase morale, ultimately breaking the cycle of mistrust, lack of purpose, and lack of recognition employees and administration often feel.

This presentation uses up-to-date research from Harvard Business School, MIT Sloan School of Management, and other tactics to drive morale upward and increase officer motivation, naturally reducing the number of resignations. Fewer resignations decrease the urgency and pressure to recruit new employees. Changing the culture will help build an agency that not only outlasts us but also sets up future leaders for success.

## **Beyond the Ticket: Leveraging Traffic Enforcement to Enhance Criminal Intelligence**

Julie Horn, Intelligence Analyst 4, NYSP, New York State Intelligence Center  
Julie.Horn@troopers.ny.gov

This presentation will expand upon the intersection of traffic enforcement and criminal intelligence. Audiences will receive a primer on the analytic tools and resources available to them through the New York State Intelligence Center. At the conclusion, each attendee will have a better understanding of their individual ability to contribute to the development of actionable criminal intelligence.

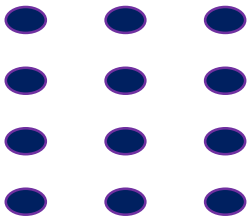

## Oral Fluids Implementation

Amanda Nissen, Assistant Counsel, New York State Police, Office of Counsel  
Amanda.Nissen@troopers.ny.gov

Amanda Cadau, Supervisor of Forensic Services/Toxicology, New York State Police, Forensic Investigation Center  
Amanda.Cadau@troopers.ny.gov

Joseph Turoski, Trooper, Drug Recognition Expert, New York State Police, Troop T  
Joseph.Turoski@troopers.ny.gov

This session will focus on the use of oral fluid testing to support driving while under the influence of drugs investigations. Lab based evidential testing will be discussed. The training is designed for toxicologists, law enforcement, attorneys, and other traffic safety partners to successfully implement the use of oral fluid in their departments impaired driving programs.

### Special thanks to the

**Empire State Law Enforcement Traffic Safety Conference Committee,  
for their professionalism, hard work and dedication  
to this educational conference.**

## **RADARSIGN, LLC**

Anna Duckworth

470-577-4982

aduckworth@radarsign.com

www.radarsign.com

Chris Pagnello

518-877-5401

At Radarsign, we revolutionize road safety with our cutting-edge technology. Engineered for unmatched reliability, crystal-clear visibility, and unrivaled vandal resistance, our radar speed signs redefine traffic calming solutions. We offer a range of models, including AC-powered, solar-powered, and portable battery-powered options. And for those concerned with school safety, our radar speed signs can be integrated with school zone beacon systems for added security.

You can access and manage our signs effortlessly through Wi-Fi or Cloud services, making real-time monitoring and control a breeze. Our radar speed signs are 100% MUTCD-compliant, meeting the highest industry standards.

What sets us apart is our unwavering commitment to quality. Radarsign proudly operates with a Certified Quality System ISO 9001:2015, ensuring that every product we deliver exceeds expectations. We take immense pride in being an American company, with all our engineering and manufacturing carried out right here in the USA.

## **DRIVESQUARE, INC.**

Konstantin Sizov

617-762-4013 x.111

sales@drivesquare.com

www.drivingsimulator.com

Drive Square offers innovative, portable Driving Simulators for effective public outreach and law enforcement (LEO) training. Our simulator programs, used to augment D.A.R.E. and others, engage participants directly at schools to vividly demonstrate the hazards of distracted and intoxicated driving through virtual experiences in real vehicles. They also provide a practical, cost-efficient solution for officer training in pursuits, traffic stops, and situational awareness directly in the field, eliminating the need for a traditional training center. Backed by multiple studies confirming their training effectiveness, Driving Simulators are available for both purchase or daily use, enhancing safety education and operational readiness.
